ESD & Clean Room Products

KM Clean Paper Product is specially designed for writing, printing, and photo copying in the cleanroom environment. Through the polymerization process, fiber, lint, and particulates are tightly bound into the sheet and decrease electro-static buildup, which will eventually minimize the scrap rate of the copier. KM Clean Paper Product provides a variety of colors and sizes such as a notebook, printer form, memo pad, chart paper, etc.

- Significantly reduced particle counts
- Enhanced ink reception for clear printing
- Decrease the scrap rate of copier or printer
- Provide any kind of style, size and color
- Lined type notebook: Minimize particle from holes
- Spiral type notebook: Polypropylene hardcover
- Clean-it: easily stick to any surfaces and leaves no adhesive residue after removal
- Chart Paper: Measuring chart paper for strip chart, thermal array and oscillo graphic recorders (Especially used Yokogawa recorder)
- Applications: Writing or printing media in the cleanroom
